## PROFESSIONAL SUMMARY

HR and People Operations professional with nearly three years of experience across employee relations, recruitment, performance management, HR operations, and people systems in high-volume, multi-site, and remote-first organizations. Progressed from HR administration and employee relations at PalmPay, supporting records for 1,000+ employees across seven states, to independently managing the HR function at MegaTank and leading People Operations initiatives at Shae Group. Experienced in designing employee lifecycle processes, implementing HR systems, developing performance management frameworks, and building AI-assisted workflows using ClickUp, Workable, Notion, Make, and n8n. Combines hands-on HR delivery, cross-functional stakeholder management, and technical problem-solving to improve operational consistency, employee experience, and workforce effectiveness.

## CORE COMPETENCIES

- **Recruitment**: Full-cycle recruiting, candidate outreach (email/WhatsApp), interview scheduling & rescheduling, pipeline/stage management, role-specific assessment design, test-task review, candidate experience, recruitment reporting
- **People Operations**: Onboarding & offboarding coordination, contract signing, employee relations & grievance handling, leave administration, HR documentation, policy drafting & rollout, SOP development, contractor lifecycle & compliance
- **Performance & Accountability**: Performance Management, Probation reviews, pulse checks, action plans, SOD/EOD tracking, accountability scorecards, manager support, remote-team visibility
- **HR Systems & Automation**: ClickUp task governance, ATS administration (Workable), AI-assisted recruiting/HR workflow design, dashboards & analytics, data-privacy & bias governance
- **People Operations & Employee Lifecycle▪** Process Design & Standardization▪ HR Technology & Systems
- **Recruitment Operations▪** Performance Management Frameworks▪ Workflow Automation Architecture
- **Onboarding & Offboarding Systems▪** Leave & Absence Automation▪ Human-in-the-Loop AI Governance
- **Employee Relations & Compliance▪** Operational Governance & Audit Trails▪ Stakeholder & Cross-Functional Mgmt
- **Change Management▪** Policy & Documentation Systems▪ Data Analysis & Operational Reporting

## TECHNICAL SKILLS

- **HRIS & Recruitment Systems:** Workable, HireFlix, ClickUp, Notion, Airtable, GoHighLevel
- **Workflow Automation & Integration:** n8n, Make, REST APIs, Webhooks, Google Workspace Automation
- **AI & People Analytics:** OpenAI, Google Gemini, Claude, AI-Assisted Workflows, Prompt Engineering, Human-in-the-Loop Evaluation, Google Sheets Reporting
- **Technical & Data Skills:** Python, Pandas, SQL Fundamentals, Flask, Google APIs, Data Cleaning & Reporting
- **Productivity & Collaboration:** Google Workspace, Microsoft, Slack, ClickUp, Jira, Asana, Zoom, Basecamp, Lucidchart, Figma

## PROFESSIONAL EXPERIENCE

**Shae Group** **Brisbane, Australia**
*People Operations Lead* *February 2026 - Present*

- Lead People Operations across the employee and contractor lifecycle, overseeing talent acquisition, onboarding, performance management, employee relations, policy implementation, and offboarding for a globally distributed workforce.
- Own full-cycle recruitment for technical, creative, and business functions, partnering with department heads to define hiring requirements, establish role-specific success criteria, develop structured assessments, and manage selection processes through Workable, HireFlix, and integrated recruitment workflows.
- Independently own the end-to-end performance management cycle, partnering with department heads to translate job descriptions into measurable KPIs, establish performance expectations during contracting and onboarding, and lead 90-day check-ins, six-month probation reviews, employee self-assessments, manager evaluations, and subsequent KPI realignment.
- Designed and implemented a Performance Intelligence framework integrating task progression, responsiveness, time tracking, and process compliance into structured daily and weekly reporting, enabling early identification of performance risks, evidence-based manager interventions, and continuous performance monitoring.
- Built a nine-stage AI-assisted Recruitment Operating System integrating Workable, HireFlix, Google Workspace, ClickUp, and automation tools to standardize candidate evaluation, streamline administrative workflows, improve pipeline visibility, and maintain human oversight of hiring decisions.
- Designed and implemented structured employee onboarding and offboarding frameworks covering employment documentation, system provisioning, policy acknowledgements, training assignments, access revocation, knowledge transfer, and exit compliance, improving consistency and accountability across employee transitions.
- Developed an AI-first Project Manager learning and capability development programme, designing approximately 20 gamified learning tasks within ClickUp covering AI proficiency, project management workflows, organizational expectations, and operational practices to support role readiness and technology adoption.
- Designed and deployed HR workflow automations covering leave approvals, balance tracking, employee communications, and

timezone-aware accountability reminders, reducing repetitive manual coordination and strengthening operational visibility and process consistency.
- Lead HR process governance and continuous improvement initiatives, developing policies, SOPs, operational documentation, and reporting frameworks while partnering with leadership to translate business requirements into scalable, technology-enabled People Operations processes.

**GT Powertank** **Ikeja, Lagos State**
*Human Resource Officer* *January 2025 – February 2026*

- Independently managed the HR function across recruitment, onboarding, payroll, employee relations, learning and development, engagement, performance administration, and offboarding.
- Partnered with department managers to assess workforce requirements, coordinate hiring priorities, and manage full-cycle recruitment from sourcing and selection through offer administration and onboarding.
- Designed and implemented a lightweight HR management system in Notion to centralize personnel information and strengthen employee record management.
- Built a low-code recruitment automation using Make to streamline candidate acknowledgement emails, improving application communication without investing in a conventional ATS.
- Managed payroll processing and employee lifecycle administration, maintaining personnel records, probation documentation, employment changes, and exit processes.
- Developed HR policies, SOPs, and standardized documentation to improve process consistency, compliance, and operational efficiency.
- Coordinated onboarding and day-to-day HR support for expatriate employees, supporting documentation requirements and communication across multicultural teams.
- Coordinated employee lifecycle activities including onboarding, probation follow-up, employee documentation, transfers, and offboarding while maintaining accurate personnel records.
- Worked closely with expatriate employees to coordinate onboarding, documentation, communication, and day-to-day support, strengthening collaboration across multicultural teams.

**Palmpay** **Ikeja, Lagos State**
*Employee Relations Specialist* *November 2024 - January 2025*

- Served as the primary People Operations contact for employee relations across five business locations, managing workplace concerns with empathy, consistency, and confidentiality.
- Managed employee records for more than 1,000 employees across seven states, ensuring data accuracy, operational readiness, and reliable HR administration.
- Managed employee relations operations and personnel data accuracy for a workforce exceeding 1,000 employees across seven states.
- Conducted background verification and employee record checks, supporting employment compliance and accurate workforce information.
- Handled workplace conflicts and employee concerns, working with relevant stakeholders to facilitate resolution.
- Coordinated employee engagement initiatives and monitored compliance with established HR policies and operational processes.
- Designed and implemented a structured employee grievance process that improved issue resolution, strengthened trust, and reduced workplace conflicts.
- Delivered employee engagement initiatives including wellness programmes, recognition activities, and team-building events that increased participation and strengthened workplace culture.

*Human Resource Assistant*| **Palmpay** *March 2024 – November 2024*

- Coordinated onboarding for more than 300 employees, ensuring timely completion of documentation, orientation, systems access, and training activities.
- Supported HR Business Partners with high-volume recruitment and candidate screening, conducting up to 50 interviews daily.
- Introduced structured exit interviews and developed standardized forms to capture employee departure feedback.
- Initiated employee recognition activities, including birthday celebrations, and supported internal communications and engagement initiatives.

**Bridgemead Consulting** **VI, Lagos State**
*Human Resources Intern* *Oct 2023 – March 2024*

- Conducted market research and competitor analysis to guide HR service delivery.
- Supported recruitment operations, including job description development, CV screening, candidate communication, and interview coordination.
- Contributed to the design of a Job Platform Management System intended to replace fragmented recruitment workflows managed through Google Forms and Gmail.
- Collaborated with an HR Technical Analyst to map recruitment workflows, document functional requirements, and translate business processes into technical specifications for frontend engineers.
- Used Lucidchart and Figma-based process mapping to visualize candidate journeys, system interactions, and proposed

recruitment workflows.
- Supported business development activities, client research, and operational documentation for consulting engagements.

## EDUCATION

**University of Ilorin** **Ilorin, Kwara State**
BSc. Industrial Relations and Personnel Management
***Honors:*** *Best Graduating Student in Department (GPA: 4.32/5.0).*

## TRAININGS & CERTIFICATIONS

- **IBM:** Generative AI Introduction & Applications 2025
- **IBM:** Python for Data Science, AI & Development 2025
- **IBM:** Building Generative AI-Powered Applications with Python 2025
- **IBM:** Data Analysis with Python 2025
- **Microsoft:** Reactor (Python + AI: Structured Outputs, Vector Embeddings, Vision Models, Quality and Safety, Tool Calling, Large Language Models, Retrieval Augmented Generation, Model Context Protocol, AI agents) 2025
- **Google:** Kaggle's 5 Days AI Agents Intensive Course 2025
- **PromptMates**: Recruiter Automation & Claude Code Webinar 2026

## PROJECTS

**AI Voice Interview Scheduler** | Click Link to View Demo 2026
**Tech Stack:** n8n, Google Calendar API, Vapi (Voice AI), Airtable, Twilio, OpenAI, Gmail API

- Built an end-to-end AI-driven voice assistant to automate candidate outreach, interview scheduling, and recruitment status tracking.
- Orchestrated complex workflow logic in n8n using advanced routing and "contains" logic to process real-time call outcomes and metadata.
- Integrated Vapi and Twilio to deploy a natural-sounding voice assistant capable of handling real-time natural language inquiries about job roles and dates.
- Utilized Airtable as a central database to manage candidate records, preferred slots, and live status updates (e.g., "Confirmed," "Busy," "Reschedule").

**TelegramHR BOT** | Click here to go to BOT 2026
**Tech Stack:** n8n, Quadrant, airtable, Telegram API, Google Gemini Embeddings, Open AI chat model, API Integration

- Built a functional Telegram-based HR assistant to handle routine HR queries through conversational chat.
- Enabled leave requests, policy explanations, attendance checks, and general HR support interactions.
- Integrated automated workflows with a lightweight backend for storing and retrieving employee data.
- Reduced repetitive HR tasks by automating common requests and responses.
- Designed the bot for real-world use, ensuring fast, accessible HR support within Telegram.

**Career Recommendation System Using NLP and Embeddings** 2026
**Tech Stack:** NLP, Sentence transformers, pandas, scikit-Learn, Python, Cosine Similarity.

- Built a semantic similarity-based recommendation system using sentence transformers (all-MiniLM-L6-v2) from Hugging Face to match student interests with suitable career paths.
- Implemented cosine similarity for ranking careers based on 384-dimensional embeddings, achieving contextual understanding beyond keyword matching (e.g., 'programming' = 'coding').
- Developed system using Python, scikit-learn, and sentence-transformers, with end-to-end pipeline from data preparation to interactive demo.

**AI Onboarding Agent** | drive.google.com/file/d/1p-HJGGyhcV3Yo1BP6oCoSWGHGQa1uvFR/view 2025
**Tech Stack:** n8n, LLM API (MistralAI), Tally API, Webhooks, Gmail API, Prompt & Context Engineering

- Built an AI-powered onboarding assistant to guide new employees through onboarding processes via conversational interfaces.
- Designed event-driven onboarding workflows using n8n to orchestrate triggers, conditions, and multi-step automation.
- Integrated Tally forms to collect new employee data and onboarding inputs via API and webhook listeners.
- Implemented webhook-based ingestion to trigger onboarding flows immediately after form submission.

Automated onboarding steps such as welcome flows, resource sharing, and reminders, significantly reducing manual HR effort.

**Culturecore** | culturecoresaas.netlify.app (*Built with Antigravity)* 2025
**Tech Stack:** Next.js 14, TypeScript, React

- Built a SaaS platform that helps HR teams and founders define, document, and measure company culture in a structured way.
- Architected the application using Next.js 14 App Router with a modern TypeScript-first setup.
- Designed the UI with Tailwind CSS and responsive layout patterns for clean, scalable presentation.

- Implemented motion and interaction effects using Framer Motion to improve user experience and engagement.
- Used AI-assisted development (Antigravity) to accelerate component generation while maintaining full control over system structure, UX decisions, and business logic.

**AI Career Coach |** ai-career-coach-cono.onrender.com 2025
**Tech Stack:** Python, Flask, HTML, CSS, JavaScript, Google Gemini API, Google Sheets API

- Designed and built an AI-powered career assistant that reviews CVs, drafts cover letters, and provides personalised career guidance.
- Developed the backend using Flask, handling routing, request processing, and AI inference workflows.
- Integrated Google Gemini (flash-2.5) via the google-generativeai SDK to generate context-aware career recommendations.
- Applied prompt and context engineering to improve relevance, tone, and consistency of AI outputs.
- Implemented PDF CV parsing and file handling using PyPDF2 and Pillow.
- Connected the application to Google Sheets using gspread and OAuth for lightweight data storage and tracking.

**Job Application Tracker |** github.com/ThegalDev/job-application-tracker **(***Hosted Locally*) 2025
**Tech Stack:** Python, Flask, HTML, CSS, JavaScript, Chrome Extension API

- Built a succinct job application tracking system to source, monitor, and record job applications in one place.
- Developed a Flask-based backend and web dashboard to manage application data and expose internal APIs.
- Implemented background automation scripts to monitor emails and capture job opportunities from multiple sources.
- Designed a lightweight Chrome browser extension to enable quick job sourcing and seamless integration with the tracker.
- Stored and managed application records using a structured CSV-based data store for simplicity and portability.
- Created basic operational scripts to streamline local setup and execution of the tracker.

**Recruitment Operating System (AI-Assisted, 9-Stage Pipeline)** 2025–2026
**Problem:** A largely manual nine-stage hiring pipeline with no centralized reporting or consistent scoring — recruiters pulled data across Workable, Google Forms, Hireflix, and ClickUp by hand.
**System:** End-to-end event-driven architecture orchestrated in n8n: data ingestion, AI scoring/summaries, rule-based stage movement, digest notifications, automated candidate-report generation, and global error handling — fully specified in a technical handover (workflow logic, DB schema, API map, phased rollout).
**Stack:** n8n, Workable API, Google Sheets/Drive/Forms, Hireflix, Zoom, ClickUp, GoHighLevel, OpenAI/Gemini.
**Impact:** Reduced screening time and notification fatigue, standardized scorecards for fairer decisions, and created real-time analytics and audit trails — with human-in-the-loop approval preserved at every subjective stage.

**Leave Management Automation** 2026
**Problem:** Manual leave tracking with no reliable approval trail or single source of truth for balances.
**System:** Workflow that notifies the relevant manager on request, communicates the decision back to the employee, and auto-updates leave balances in a central Google Sheet.
**Impact:** Eliminated manual balance tracking, created an auditable approval path, and improved accountability.

**ClickBot Accountability System (Automated Check-Ins)** 2026
**Problem:** HR manually chased SOD/EOD updates and ClickUp time-tracking from a distributed team every day.
**System:** Scheduled, timezone-aware ClickUp bot that automates start/end-of-day and time-tracking check-ins.
**Impact:** Removed daily manual follow-up and gave leadership consistent, real-time execution visibility.

**Performance Management Intelligence Framework** 2026
**Problem:** Performance signals scattered across many tools meant issues were caught late and inconsistently.
**System:** A monitoring-and-reporting framework defining visibility/execution/communication/blocker signals, four-tier risk scoring, warm timezone-aware check-ins, daily leadership digests, and strict human-decision boundaries.
**Impact:** Moved performance oversight from reactive manual review to early, evidence-based intervention and recognition.
